## INTELLIGENT MAILING

### COST CONTROL, MAIL MANAGEMENT AND SIMPLER OPERATIONS

The IM460 is the perfect solution for fast, simple and accurate mail processing. It helps you efficiently manage mailing operations and control postage costs, bringing intelligent mailing to every office environment. Employing the latest in user-friendly technology, the IM460 can dramatically reduce mail processing time and significantly increase productivity. Its "online management" capabilities can streamline your mailing operations by allowing for easy monitoring, tracking, and controlling of costs.

### SELF-ALIGNING, EFFICIENT FEEDING OF MIXED-SIZE MAIL

The mixed-size feeder eliminates the need to manually sort mail by size, thereby allowing you to process mail faster and more efficiently. By eliminating manual adjustments, the IM460 automatically processes and seals different sizes and formats of envelopes within the same batch. And, the system's anti-skew rollers properly align mail pieces, effectively eliminating jams and avoiding costly misprints.

### DRAMATICALLY REDUCE PROCESSING TIME WITH DYNAMIC WEIGHING

The IM Dynamic Weighing Platform (IMDWP), with its patented Four Point Detection System, keeps

you in compliance with USPS® Shape-Based Pricing requirements. It automatically weighs, measures and rates mail pieces so you don't over- or under-post mail. At 60 letters per minute, the IMDWP processes your mail fast and accurately.
