FAST, EASY, COMPACT

OFFICE SOLUTION

M1500

The office-friendly system for folding and inserting mail

HASLER
America's better choice.®

HASLER'S M1500

GET THE MAIL OUT... AND ALL YOUR OTHER WORK TOO

With Hasler's M1500 system, manual folding, inserting and sealing mail can now be done in minutes, instead of hours. That means significant time will be available to do all the other things that need to be accomplished in your office.

The M1500 is very easy to use. Load envelopes and documents. Select a pre-programmed job. Press a button. That's all there is to it. The M1500 goes to work producing a professional looking mail piece every time.

The compact M1500 can be placed on a desktop for convenient access. Its color touch screen makes operation easy and intuitive. But, don't let its low profile fool you. It has been designed to power through a variety of folding and inserting tasks including: letters, invoices, statements, legal documents, half-folded marketing pieces and daily mail.

Simply load documents and envelopes, select a job and press start — it's that easy

EASY AND INTUITIVE WITH INSTANT JOB RECALL

An intuitive color touch screen guides the operator through a new job setup. The M1500's 15-job memory provides instant recall for the most frequently used folding, inserting and sealing tasks.

An adjustable catch tray allows for processing of a variety of envelopes

A PERFECT FIT FOR YOUR OFFICE

In addition to being easy to use, versatile and productive, the M1500 is compact and reasonably quiet. It will blend in nicely with your workflow and office environment.

The space taken up by this solution is optimized even further thanks to its adjustable catch tray.
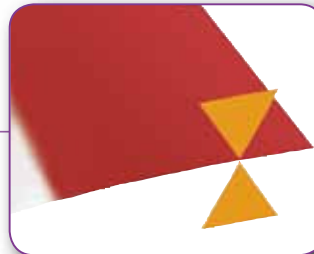

Two document feeders provide increased versatility and productivity: Collate separate sheets, alternate single document insertions between trays for long unattended runs, or manually feed up to five sheets

A special insert feeder allows for the insertion of business reply envelopes, marketing flyers, etc.

Sleek design, compact footprint, low noise and increased office productivity make the M1500 a welcome addition to your office

HASLER M1500

SUPERIOR ACCESSIBILITY KEEPS YOU UP AND RUNNING

With only one button to open the M1500, there is quick and easy access to the folding area and paper path.

MAIL INTEGRITY AND ACCURACY ASSURED

Hasler's double document detection system prevents double feeding. This electro-mechanical system is not sensitive to paper dust or colored paper, thus ensuring the right document gets to the correct recipient.

MEETS A BROAD RANGE OF MAILING NEEDS

The M1500 can handle a wide range of documents, envelopes and even inserts or business reply envelopes. You can choose between three fold types according to your mailing requirements.

Continuous operation is achieved by linking feeder trays. If one feeder runs empty, another one takes over. A semi-automatic feed function makes it possible to feed up to five sheets, with or without staples.

OFFICE FRIENDLY FOLDER INSERTER

AUTOMATED FOR OPTIMAL MAIL FLOW

The M1500 can be connected to a Hasler mailing system to automate your entire mail flow. Fold, insert and meter your mail all in one seamless step with the optional IM420 or IM440 mailing system interface.

M1500 FEATURES

STANDARD
- Color touch screen
- 15 programmable jobs
- 2 sheet and 1 insert/BRE feeders
- secure'n Feed™ double detection
- Automatic thickness adjusting feeders
- Cascade feeding
- Manual feed mode
- Tip-to-tip sealing
- Small footprint

OPTIONAL
Fill and Mail system integration
Output Management Software
Furniture

ENVIRONMENTAL COMMITMENT

Hasler launched eco signature to identify the most efficient and environmental friendly solutions. The signature reflects our aim to inform customers of the environmental progress we have made in recent years.

With the M1500, we have achieved great improvement. The M1500 is compliant with environmental regulations (Energy related product – standby and off mode, REACH, ROHS, and WEEE).

ENERGY: The M1500 consumes seven times less energy due to automatic sleep mode and auto-off (0,3W) during a working year.*

PACKAGING: The carbon footprint during transport is improved since ratio of packaging volume vs. M1500 volume is low.**
