COUNTERS	One operator resettable job counter, one permanent lifetime counter		

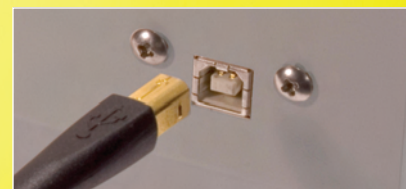

Your mailings are getting larger and larger. You need a basic addressing system optimized for productivity. You want features found in larger systems, but at a cost that makes sense for your growing company.

The RENA Systems Envelope Imager 1.5 is the entry-level addressing system that's high-performance all the way. A new design puts the power of RENA System's precision engineering to work to meet every type of basic addressing need.

Your postcards, letters and flats will fly through as the fixed-head system prints an eight-line address and a barcode in one pass.

The 1.5 prints at one fixed speed – fast -- up to 7,200 envelopes or 11,000 postcards an hour. The feeder conveniently holds 300 envelopes at a time to increase productivity. Solid-body, high-grade steel and metal construction means this American-made tabletop workhorse will be an unsurpassed reliable performer for years and years.

A processor with 64 MB of memory powers the 1.5, and it's a snap to integrate with your Windows based PC. Just plug in through a USB 2.0 port and start planning your large mailing projects with confidence.

KEY FEATURES

- **Addresses postcards, envelopes, flats and more at speeds up to 11,000/hr.**
- **Prints from 150 to 600 dpi to optimize ink performance on any stock.**
- **Prints all TrueType Fonts**
- **USB 2.0 port for quick and easy connectivity.**
- **Handles materials up to 14" wide and 1/8" thick.**
