SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE

The Mach 8 is RENA's newest top of the line printer. This is one heavy duty machine that gets the job done and gets it done quickly. It is meant for printing large quantities of letter size sheets of paper, so you won't have to keep refilling the paper tray over and over.

Bring your printed documents to life with its stunning full color inkjet printing system by Memjet. With this revolutionary technology, you can achieve the best of both worlds: productivity *and* quality. At best quality, imagine printing 60 pages per minute at 1600 x 800 dpi!

Not only does the Mach 8 give you productivity and quality, but it also gives you profitability. You will quickly see a return on investment with this high performance

machine. The ink tanks each hold a volume of 250 ml so you can rest easy knowing your printing costs are under control.

Because it's all digital, there are no setup costs and you can also produce small runs for those times when you only need to print a handful of documents. Variable images and data can be used so that every piece that is printed is unique.

Along with the rest of RENA's product line, the Mach 8 is built to keep you satisfied for years on end with its sturdy and American-made all metal construction. Contact your local RENA Systems dealer today for more information.

KEY FEATURES

- **Print in brilliant full color quality at 1600 x 1600 dots per inch**
- **Have the ability to produce large quantities or short runs with ease**
- **Feeder holds up to 5,000 letter size pages**
- **Ultra fast color printing at speeds up to 12 inches per second**
